

Laborator 6

1. Structurarea pe straturi a unei aplicatii

Exemplu de aplicatie: "1. DemoLayering"

Se remarca utilizarea de Abstract Factory si Factory method.

foldere:

docs (folder)

code (folder)

 DataLayer (folder)

 DataAccessLayer (proiect, class library)

 DomainLayer (folder)

 DomainModel (folder)

 DomainModel (proiect, class library)

 TestDomainModel (proiect, class library)

 ServiceLayer (folder)

 ServiceLayer (proiect, class library)

 TestServiceLayer (proiect, class library)

 UserInterfaces (folder)

 Console (folder)

 MyApplication (proiect, console application)

2. Stilul de lucru "model first" in Entity framework: proiect "Demo_EF2" si film "Utilizare_EF_pentru proiectul Demo_EF2.wmv"

Nota: in proiectele date s-ar putea sa fie nevoie sa modificati stringul de conexiune.
